🔌 1. INSTALLATION & CONNECTION

Q: My dashboard says "LICENSE PENDING" even after I entered my key.

A: This means MT5 cannot reach the Uluka security server. Follow these steps:

1. In MT5 go to Tools > Options > Expert Advisors tab.
2. Tick "Allow WebRequest for listed URL".
3. Add your Server URL (provided in your welcome message) to the Allowed URLs list.
4. Ensure the "Algo Trading" button at the top of MT5 is green (not grey).
5. Detach and reattach the EA to the chart. The dashboard should update to "AUTHORIZED".

Q: The EA removes itself immediately after I attach it.

A: This is a security rejection. Open the Experts tab in MT5 and look for one of these messages:

"INVALID KEY" Check the spelling — it is Licence_Key (not License or Lincense). Copy-paste directly from your welcome message.

"LIMIT_EXCEEDED" Your account balance is higher than the Tier your licence allows. Upgrade to a higher tier or contact support.

"ACCOUNT NOT AUTHORIZED" Your MT5 account number is not registered to this key. Contact @UlukaOwlbot to re-bind the key.

Q: Can I run the EA on a VPS?

A: Yes — a Windows VPS is strongly recommended for 24/7 operation. This ensures signals are sent on time, the licence heartbeat stays connected, and the EA does not miss trading sessions due to your PC going offline.

Q: Can I run the EA on multiple charts at once?

A: Yes. Attach the EA to a separate chart for each symbol (e.g. EURUSD, XAUUSD, GBPUSD). Use the same Magic Number and Licence Key on all charts. Each chart trades its own symbol independently and only sends hoots for its own trades.

🛡️ 2. INSTITUTIONAL RISK ENGINE

Q: The EA printed "Target Risk: $5.45 | Min Lot Risk: $6.13" and did not take a trade.

A: This is the Strict Risk Shield protecting you. Even at the minimum 0.01 lot size, the ATR volatility of the current market would push your dollar risk above your set Risk_Per_Trade_Percent limit.

> 💡 **Fix:** Increase RISK_Per_Trade_Percent to 1.5% or 2.0% in settings to allow trades on smaller accounts. Alternatively wait for a lower-volatility setup where ATR is smaller.

Q: I do not see any SL or TP lines on my chart. Is the EA trading without protection?

A: No. Uluka Ultra uses Stealth Mode. The Stop Loss and Take Profit are managed entirely inside the EA — they are never sent to the broker server as visible orders. This protects you from broker stop hunting and hides your levels from institutional algorithms. Your trades are fully protected at all times.

Q: Does the EA stop working if my account grows into a higher tier?

A: No. The Tier Cap only checks your initial balance at the moment you first start the EA. If you start at $1,000 and grow to $5,000 through profitable trading, the EA continues operating normally. The cap protects against starting with an under-licensed balance — it does not penalise your profits.

Q: What is the Capital Protection Mode?

A: When consecutive losses exceed a threshold, or equity drops sharply, the EA activates Capital Protection Mode. Risk per trade is automatically reduced (e.g. 0.25%) and the dashboard shows an orange warning label. This prevents runaway losses and allows the account to recover gradually.

🎯 3. STRATEGY & AI SETTINGS

Q: What are the "Master Owl" and "Uluka Ultra" trade comments in my history?

A: These are Trade Comments — labels the EA attaches to every order it places. They allow you to instantly identify AI-executed trades in your MT5 history versus any manual trades you place.

Client EA: Trades are labeled "Uluka Ultra" *(For all Retail CLients)*

Master EA: Trades are labeled "Master Owl" *(For institutions and organizations)*

Q: How does the Dynamic Profit Shield (ATR Trailing) work?

A: Once a trade reaches your Trailing_Start_Points profit threshold, the EA activates an ATR-based trailing stop. It quietly moves the stealth stop loss behind the price at every tick — locking in gains progressively. If the market reverses sharply (a "V-spike" from news), the trail fires and closes the trade with profit protected.

Q: What is ULUKA_Vision vs ULUKA_Farsight strategy?

A: These are the two core strategy modes:

ULUKA_Vision: Default mode. Uses your custom Speed and Strength inputs. More responsive to market changes. Best for normal trading conditions.

ULUKA_Farsight: Conservative mode. Uses fixed parameters (Speed=24, Strength=0.9). Fewer but higher-quality entries. Best for volatile or low-liquidity sessions.

Q: What is the AI DNA Fingerprint and how does it learn?

A: The DNA Fingerprint records the outcome of every trade — along with the strategy used, market regime, and session. Over time it builds a personal performance map for your account. It then uses this data to reduce risk on historically bad strategy/session combinations, block entries in losing patterns, and boost the confidence score on proven setups.

Q: What does the Confidence Score mean?

A: The Confidence Score (0-100%) is the EA's real-time assessment of trade quality. It combines the AI trend filter, SMC signal strength, HTF bias, session quality, market regime, and DNA history bonus. A trade will only execute if the score meets or exceeds your Min_Confidence_Score setting (default: 65%). Higher scores mean stronger setups.

🛠️ 4. TECHNICAL TROUBLESHOOTING

Q: The EA disappeared from my chart.

A: This happens when the Daily Loss Limit is triggered ("DD LIMIT HIT"). The Hard Shield removes the EA to protect your remaining capital. You can manually reattach it to the same chart after the daily reset at 00:00 Broker Time. The EA will resume trading the next day automatically.

Q: How often does the EA sync with the security server?

A: Every 5 minutes. This heartbeat verifies your licence, equity tier, and cloud status with the Uluka Intelligence Server. If the connection fails temporarily, the EA continues trading from its last known state and retries on the next cycle.

Q: The EA is attached but not entering any trades.

A: Check the Experts tab in MT5 for messages. Common causes:

Confidence too low: The market is not meeting your Min_Confidence_Score threshold. Normal during choppy or ranging markets.

Spread too wide: Current spread exceeds your MaxSpread setting. Lower-liquidity hours (Asian session, holidays) often have wider spreads.

News Guard active: A high-impact news event is within your Mins_Before_News window.

Daily limit hit: The Daily_Loss_Limit has been reached for today. Trading resumes tomorrow.

CHAOTIC regime: The AI has detected an unstable market. The EA waits for conditions to stabilise.

Q: I am getting duplicate trades on the same symbol.

A: This happens when the EA is attached to more than one chart of the same symbol (e.g. two XAUUSD M5 charts). Each symbol should have only ONE chart with the EA. Open your Navigator panel, check which charts have the EA icon, and remove duplicates.

🔑 5. LICENCE & ACCOUNT

Q: How do I find my MT5 account number?

A: Your account number is shown at the top of the MT5 terminal window, or in the Navigator panel under Accounts. It is also displayed on the Uluka dashboard panel when the EA is attached correctly.

Q: How do I check my licence expiry date?

© 2026 Uluka Ultra

A: The expiry date is shown on the EA dashboard panel on your chart (the "Licence: X days remaining" line). You also receive it in your activation message and in your daily EOD report if enabled.

Q: Can I move my licence to a different MT5 account?

A: Yes — contact @UlukaOwlbot on Telegram with your old and new account numbers. The admin team can re-bind your key. Note: frequent re-binds may require identity verification to prevent key sharing.

Q: What happens when my licence expires?

A: The EA will show "LICENCE EXPIRED" on the dashboard and stop taking new trades. Existing open trades will remain open and are managed until closed. Renew via @UlukaOwlbot before expiry to avoid any interruption.

🦉 6. 3-DAY FREE TRIAL & SAFETY

Q: How long is the free trial and what are the rules?

A: The free trial lasts 3 days. During the trial period:

DEMO ACCOUNTS ONLY. We strictly require demo trading during the trial. Uluka Ultra is not responsible for any financial losses incurred on live accounts during a trial period.

Full features available. All EA features are active during the trial so you can evaluate the full system.

No credit card required. The trial is completely free with no payment commitment.

Q: Can I use the trial on a live account?

A: We strongly advise against it. The trial is intended for demo evaluation only. If you choose to run it live during the trial period, you do so entirely at your own risk. Uluka Ultra bears no responsibility for live account losses during trial.

Q: How do I upgrade from trial to a paid subscription?

A: Message @UlukaOwlbot on Telegram or fill in the subscription form link provided in your welcome message. The team will issue your paid licence key within 24 hours of payment confirmation.

📡 7. TELEGRAM & SIGNALS

Q: I am not receiving Telegram hoots (Master EA).

A: Check the following:

Allowed URLs: Add "https://api.telegram.org" to MT5 > Tools > Options > Expert Advisors > Allowed URLs.

Bot token: Verify the TG_API token in your EA settings is correct and has not been regenerated in BotFather.

Bot membership: Ensure the Uluka bot is an admin member of both your Premium and Free Telegram channels.

Enable switch: Confirm Enable_Telegram_Hoots = true in EA settings.

Q: What is the difference between Premium and Free channel hoots?

A: The two channels receive different information:

Free Channel: Entry price and TP1 only. No SL, no TP2/TP3. Limited to Free_Signal_Limit hoots per day.

Premium Channel: Full hoots — Entry, SL, TP1, TP2, TP3, Lot, Risk %, Confidence Score, Health Score, Session, Strategy, and P&L on close.

Q: How do I get my personal Telegram Chat ID for EOD reports?

A: Open Telegram and send a message to @userinfobot. It will instantly reply with your numeric chat ID (e.g. 1085844653). Enter this number in the MyPersonalChatID field (Master EA) or Personal_Chat_ID field (Client EA).

Q: What is included in the daily EOD report?

A: The EOD report sends each evening to your personal Telegram and includes: total trades today, wins and losses, daily P&L in $, all-time cumulative P&L, current health score, active market regime, and your licence expiry date.

© 2026 Uluka Ultra

🏆 8. PROP FIRM MODE

Q: Which prop firms are supported?

A: The Master EA includes built-in rule presets for:

PROP_FTMO — FTMO Challenge & Verification
PROP_MFF — My Forex Funds
PROP_GENERIC — Rest all others
PROP_NONE — Disabled (personal or live account)

Q: Does Prop Firm Mode automatically set the correct risk limits?

A: Yes. When you select a prop firm, the EA automatically overrides your manual Risk_Per_Trade_Percent and Daily_Loss_Limit to match that firm's published challenge rules. It also blocks trading when 80% of the daily drawdown limit is reached.

Q: Is the Client EA suitable for prop firm challenges?

A: Yes, the Client EA also have a dedicated Prop Firm Mode which includes full prop firm presets, Guardian Angel, Capital Growth Governor, and automatic limit enforcement.

💰 9. PAYMENTS & SUBSCRIPTION

Q: What plans are available?

A: Uluka Ultra offers three plans:

Plan A — PAYE: $149 setup + 10% security deposit + 25% weekly profit share. Minimum $500 account. Ideal for new traders.

Plan B — Fixed: $149 one-time setup + fixed monthly fee based on your equity tier (from $59 to $499/month). Annual plan waives the setup fee.

Plan C — Lifetime Hoot: $99 one-time. Unlimited Premium hoots access forever. Does not include the EA software.

Q: Is the setup fee charged every time I renew?

A: No. The $149 setup fee is a one-time charge per account. Renewals of the same plan on the same account do not incur an additional setup fee. Annual plan subscribers also have the setup fee waived entirely.

Q: What is the security deposit for Plan A and is it refundable?

© 2026 Uluka Ultra

A: The 10% security deposit is held to ensure commitment to the service. After 10 consecutive weeks of active use it is adjusted against your future profit shares — effectively returned to you. If the EA is inactive for more than 1 week without contact, the deposit is forfeited.

Q: How do I apply for a subscription?

A: Fill in the subscription request form (link in your welcome message or from @UlukaOwlbot on Telegram). You can also message @WiseOwlUluka directly for enterprise or institutional enquiries.

📞 10. CONTACT & SUPPORT

Q: How do I get support?

A: Multiple support channels are available:

Telegram Bot: @UlukaOwlbot — automated support, upgrades, licence issues, and concierge.
Owner Direct: @WiseOwlUluka — for billing, enterprise, or escalated issues.
Email: ulukabot@gmail.com — for formal support requests.

Q: What information should I include when contacting support?

A: To help us resolve your issue as quickly as possible, please include:

Account number: Your MT5 account number (found on the EA dashboard or in MT5 Navigator).
Error message: Copy the exact message from your MT5 Experts tab.
Screenshot: A screenshot of the dashboard and/or Experts tab showing the issue.
Version: Which EA version you are running (Master or Client) and the version number.

Q: Is there a community or group for Uluka Ultra users?

A: Yes. Premium subscribers have access to the private Premium Telegram channel where hoots, updates, and community discussion take place. Free channel members can join at https://t.me/UlukaUltra for free hoot access and announcements.
